ARYAMAN

Product Analyst | Drug Development Analytics
aryamananand5@gmail.com | +91-7091770073 | linkedin.com/in/absterjr | aryaman.io

PROFESSIONAL SUMMARY

Product and data analyst with 2+ years at Eli Lilly building end-to-end analytics products across pharmaceutical drug development, neuroscience, and immunology. Proven track record shipping KPI dashboards, ETL pipelines, and AI-powered tools used by 50+ stakeholders weekly. Skilled at translating complex healthcare data into decisions for commercial teams, clinical researchers, and business leaders. Core expertise in data visualization, business analysis, and stakeholder management across Agile cross-functional environments.

EXPERIENCE

Eli Lilly and Company · Bengaluru, India *Jan 2024 – Present*

Consultant – Data Engineering *Dec 2025 – Present*

- Engineered a Python/Streamlit DDL validation tool adopted by 20 engineers and 60+ analytics members, reducing table standardization time from **30 minutes to 3 seconds** with unlimited batch processing.
- Migrated legacy Redshift ETL pipelines to atomic MERGE-based Delta Lake loads on Databricks across dev/qa/prod via GitHub Actions, eliminating data integrity risks and cutting deployment overhead.
- Automated monitoring across 6 pipelines and 11 tables with a scheduled workflow system that evaluates **KPIs** against stakeholder metrics and auto-distributes tailored reports — eliminating manual oversight.

Associate – BI&A Product Analytics *Jan 2025 – Dec 2025*

- Automated 85% of a manual weekly targeting process by redesigning dashboards with parameterized queries, cutting report generation from **8 hours to under 15 minutes** and freeing analyst time for strategic work.
- Shipped 4 analytics products to production — omnichannel visualization, patient funnel analysis, and agile tracking tools — each used weekly by 30+ stakeholders to drive clinical targeting and product roadmap decisions.
- Designed reusable Power BI and Python data visualization frameworks that cut time-to-insight on new requests by **60%** and reduced HCP support tickets by 40% via embedded AI chatbots.

Associate – BI&A Neuroscience Analytics *Jul 2024 – Jan 2025*

- Built a full-stack self-serve web application (Flask + PostgreSQL + Power BI) eliminating a custom report backlog for **40+ neuroscience researchers**, enabling on-demand data visualization without analyst intervention.
- Deployed 3 therapeutic-area chatbots with embedded knowledge bases, handling **60%+** of repetitive queries and standardizing access to critical pharmaceutical data across the team.
- Standardized BI processes across neuroscience and immunology teams via reusable SQL and Python templates, cutting time-to-insight on recurring analyses by 50%.

Intern – BI&A Immunology Analytics *Jan 2024 – Jul 2024*

- Segmented **60,000+** healthcare professionals using clustering and behavioral analysis, enabling targeted campaigns that improved engagement conversion by 28% across 3 therapeutic programs.
- Replaced manual HCP reports with parameterized Power BI dashboards, cutting report generation time by 70% and lifting pharmaceutical analytics reliability from **82% to 96%** through data maturity assessment.

SKILLS

Analytics & BI: Power BI, SQL, Python (pandas, NumPy, Matplotlib), Databricks, Excel, Data Visualization
AI & Machine Learning: LLMs, RAG Architecture, GPT Fine-tuning, Generative AI, Predictive Modeling, NLP
Engineering: ETL Pipeline Development, Flask, FastAPI, PostgreSQL, Delta Lake, GitHub Actions, Streamlit
Core Competencies: Product Analytics, Business Analysis, KPI Development, Stakeholder Management, Requirements Gathering, Cross-functional Collaboration, Agile

EDUCATION

Manipal Institute of Technology *2020 – 2024*
B.Tech in Data Science and Engineering | GPA: 8.27 / 10
